# Downloading and starting the installation of the Access Management System (AMS)

This leaflet describes how to download AMS in the required language, locate the installation manual and initiate the installation process.

**IMPORTANT**: For a complete and correct installation you must follow the installation guide. Following this leaflet is **not** sufficient.

1. On the **Software & Support** tab of the AMS product, locate the row containing the ZIP file for the desired language.
2. Click any of the links in the **Language** column of that row.
3. In the popup window, choose to save the ZIP file and click **OK**.
4. Unpack the ZIP file onto a portable drive, or onto a drive that is accessible from the computer where AMS is to be installed.
5. Log onto the computer where AMS is to be installed, using an account with Administrator privileges.
6. Navigate to the folder containing the unpacked ZIP file.
7. In the **Server** subfolder, choose an installation guide (PDF file) in a convenient language.
   **Open the installation guide, and follow it at all times!**

8. Depending on which program you wish to install, Server or Client, execute one of the following setup files:
   a. **Server\AMS Server Setup.exe**
   b. **Client\AMS Client Setup.exe**
